

pattern spec

1. 设置pattern tck period

```
PatternsSpecification(design_name, design_id, pattern_id) {  
  IjtagRetargetingOptions {  
    tck_period : 20ns;  
  }  
  Patterns(patterns_name) {  
  }  
}
```

2. 设置function clock period

让仿真时，相应时间port/pin有时钟产生。

```
PatternsSpecification(design_name, design_id, pattern_id) {  
  ClockPeriods {  
    aclk : 20ns;  
    bclk : 20ns;  
  }  
  Patterns(patterns_name) {  
  }  
}
```
