

64位系统安装32位程序

以安装bcompare(beyond compare)举例：

安装过程中出现以下提示：

```
[root@localhost user]# rpm -ivh bcompare-3.3.13.18981.i386.rpm
error: Failed dependencies:
  libICE.so.6 is needed by bcompare-3.3.13-18981.i386
  libSM.so.6 is needed by bcompare-3.3.13-18981.i386
  libX11.so.6 is needed by bcompare-3.3.13-18981.i386
  libXcursor.so.1 is needed by bcompare-3.3.13-18981.i386
  libXext.so.6 is needed by bcompare-3.3.13-18981.i386
  libXft.so.2 is needed by bcompare-3.3.13-18981.i386
  libXinerama.so.1 is needed by bcompare-3.3.13-18981.i386
  libXrandr.so.2 is needed by bcompare-3.3.13-18981.i386
  libXrender.so.1 is needed by bcompare-3.3.13-18981.i386
  libfontconfig.so.1 is needed by bcompare-3.3.13-18981.i386
  libfreetype.so.6 is needed by bcompare-3.3.13-18981.i386
  libz.so.1 is needed by bcompare-3.3.13-18981.i386
```

说明没有安装相应的32位库，现需要安装。

```
yum -y install libICE.i686
yum -y install libSM.i686
yum -y install libX11.i686
yum -y install libXcursor.i686
yum -y install libXext.i686
yum -y install libXft.i686
yum -y install libXinerama.i686
yum -y install libXrandr.i686
yum -y install libXrender.i686
yum -y install libfontconfig.i686
yum -y install libfreetype.i686
yum -y install zlib*.i686
```

然后再进行安装32位的应用程序：

```
root@localhost user]# rpm -ivh bcompare-3.3.13.18981.i386.rpm
Preparing... #####
[100%]
  1:bcompare #####
[100%]
```

已经安装上了。
