

8系统

005056298689

1. i686

```
yum clean all
yum makecache
yum -y install glibc.i686
```

2. install gcc

```
yum -y install gcc
yum -y install gcc-c++
yum -y install make
```

3. gvim

```
yum -y install gvim
```

4. libxcb

```
dnf install -y xcb-util-*
ldconfig
```

5. 上不了网

一键清空所有 nftables 规则，不管什么拦截全清

```
nft flush ruleset
```

基本上就可以了。

6. meta desktop

https://docs.rockylinux.org/8/guides/desktop/mate_installation/

```
dnf config-manager --set-enabled powertools
```

```
# dnf config-manager --set-enabled crb
```

```
dnf install -y epel-release
```

```
dnf upgrade
```

```
dnf install -y NetworkManager-adsl NetworkManager-bluetooth NetworkManager-

```

```
dnf install -y lightdm-settings lightdm
```

```
systemctl set-default graphical.target
```

```
reboot
```

When the system reboots, click on your user name, but before you enter your password, click on the gear icon in the lower right of the screen and select MATE from the desktop list. Login and you should have a fully functional MATE desktop. Future logins should remember your selection.
