

# perl剪贴板分析工时

主要涉及剪贴板问题，有可能复制下来是中文乱码的原因，需要在复制内容时切换为中文键盘。

另外需要设置gbk的原因是命令行默认使用的gbk编码，直接输出其它的编码应该会是出现乱码。

clipboard复制中文字符到剪切板乱码

```
#!/usr/bin/perl

use utf8;
use Win32::Clipboard;
#use Clipboard;
use Encode;
binmode(STDOUT, ":encoding(gbk)");
binmode(STDIN, ":encoding(gbk)");
binmode(STDERR, ":encoding(gbk)");

$val = Win32::Clipboard::GetText();
#$val = Clipboard::paste();
$val = decode("gbk", $val);
#$val = decode("utf8", $val);
print $val;

$tmp_file = "_ana_work_time_clip.txt";
open(fh, '>:encoding(utf8)', "$tmp_file") || die "can't open file!";
print fh $val;
close(fh);

open(fh, '<:encoding(utf8)', $tmp_file) || die "can't open file!";
$t = 0;
$weekday = 6;
@weekstrar = ("ERROR", "周一", "周二", "周三", "周四", "周五", "周六", "周日");
$yyymm = "----";
$start_match = 0;
$worktime_valid = 0;
$jiejiari = "";
while ($line = <fh>) {

    chomp($line);
    #print "line = $line\n";

    if ($line =~ /^(\d+)\s*(\d+)\s*年\s*(\d+)\s*月/) {
        $yyymm = "$1-$2";
    }
    elsif ($line =~ /周[日一二三四五六]/) {
        $start_match = 1;
    }
}
```
