

1. 利用POSIX模块处理 向下/向上取整

```
use POSIX;  
  
POSIX::ceil(3.14) => 4    #向上取整  
  
POSIX::floor(3.14) => 3   #向下取整, 等同于 int(3.14)
```

2. 利用Math::Round 做四舍五入

```
use Math::Round;  
  
my $num = 45.4;  
  
my $round = Math::Round($num);
```
